

It's the listening that creates the difference

GOSULIN IL

Natural solution without compromises!

Gosulin IL is a vegetable based emollient made out of renewable natural sources such as Sugar and Coconut.

Gosulin IL possesses unsurpassed unique and amazing properties.

GOSULIN IL - APPLICATIONS

- Sun care
- Baby care
- Day care
- Hair care
- Replacement for Cyclomethicone, PPG-15 Stearyl Ether
- Bath oil
- Make up remover
- Antipersipants
- Aerosols
- Natural cosmetics

- Unlimited Naturally
- Volatile touch

GOSULIN IL - Natural and Safe replacement for Volatile silicones...

1) Volatile touch

Gosulin IL has a superior volatile behavior, making it the ideal "improved" replacement for volatile silicones. Unlike silicones, Gosulin IL is free from CMR, free from solvents, has no inhalation toxicity and respects our environment.

2) Reduces the soaping effect / whitening of creams

When a high amount of waxes or fatty alcohol is used, emulsions become white on the skin during application; especially natural emulsions suffer from this problem. Adding Gosulin IL to such an emulsion reduces this whitening effect efficiently.

3) Boosts spreadability

Emulsions with high amount of vegetable oils, butters or waxes have an unpleasant spreadability. Gosulin IL improves this problem in a spectacular way. The effect is comparable to volatile silicones

4) Eliminates tackiness completely

Sun screens, vitamins give a sticky skin feel. In the presence of Gosulin IL, this tackiness disappears completely. An ideal solution for day creams with a high SPF or a high content of vitamins.

... And much more

5) Soluble with Dimethicone

Almost no ingredients mix with Dimethicone. Gosulin IL is a natural exception as it mixes easily with Dimeticone. It is therefore a powerful (waterproof) make up remover without irritating the eyes.

6) Disperses solids

Gosulin IL is a perfect dispersing agent for Titanium Dioxide, Aluminium Chlorohydrate and make up pigments.

7) Dissolves sunscreens

Gosulin IL dissolves sunscreens easier than synthetic emollients such as Alkyl Benzoate.

8) Avoids oil separation

Gosulin IL is able to mix unmixable ingredients. In this way it eliminates oil separation in emulsions. Gosulin IL is also able to clarify bath oils.

9) Turns W/O into a O/W-touch

W/O-emulsions have the reputation to have a heavy feeling on the skin. Gosulin IL transforms easily these W/O-emulsions into light emulsions that can almost not be distinguished from a O/W-emulsions.

GOSULIN IL - FORMULATIONS

Dry Oil - DON-130325-A

Phase	Ingredient	INCI	Function	%
A	Gosulin IL	Isoamyl Laurate, Isoamyl Cocoate	Natural oil	92,48
	Eutanol G	Octyldodecanol	Emollient	6
	Macadamia Oil	Macadamia Ternifolia Seed Oil	Vegetable oil	0,5
	Seabuckthorn Oil	Hippophae Rhamnoides Fruit Oil	Vegetable oil	0,02
	Parfum	Parfum	Parfum	QS

GOSULIN IL - CHARACTERISTIC

- Colourless
- Odourless
- Viscosity @ 40°C <3.9 mm2/s
